

PS Rao website — content we need from you (≈30 minutes)

Sir, the new site is ready except for three things only you can supply. Reply to this message in WhatsApp (voice notes are fine) or fill in below. Rough notes are enough — the AI drafts the wording, you approve it.

1. Three engagements for "Case Studies" (≈15 min)

Pick 3 engagements you are proud of, ideally from different practice areas (e.g. one merger/restructuring, one listed-company compliance, one FEMA/startup). Clients are **anonymised** on the site — we write "Listed mid-cap pharma company", never the name.

For each one, just answer:

	Engagement 1	Engagement 2	Engagement 3
Client type (sector, listed/unlisted, size)			
What was the problem / deadline?			
What did PS Rao do? (3–4 steps)			
Result — and one number if there is one (days, ₹ amount, %, "zero observations")			
Services used (2–4 names)			

If there is no number, say so — we won't invent one.

2. Four client testimonials (≈10 min)

For each, we need the client's **own words** (a WhatsApp message, an email line, or what they said on a call) and their **permission** to publish.

	Name	Designation	Company	What they said (rough is fine)	OK to publish? (Y/N)
1					
2					
3					
4					

Nothing goes live until the client has approved the final wording — we'll send each one back to you first.

3. Leadership team (~5 min)

The site currently shows 2 people but says "25 professionals". For each partner / senior person who should appear on the Team page:

Name	Designation	Qualification (e.g. FCS, LLB)	2 lines on what they handle	Photo? (send on WhatsApp)

Photo guidance: any recent phone photo, head and shoulders, plain background. We crop and match them.

4. Two small things

- **Logo** — the image you mentioned in June didn't come through on WhatsApp. Please resend the PNG/SVG (or the original file from the printer).
- **Domain** — we would like to point **psrao.co.in** at the new site. Where are **info@** and **career@psrao.co.in** mailboxes hosted today (BigRock cPanel, Google, Zoho, other)? We need this before moving DNS so email is not disrupted.

What happens next: we draft everything in the admin panel from your notes → you review in one sitting (≈20 min) → publish. Nothing changes on the live site until you say yes.
